# HydrogenDays<sup>2016</sup>

Dear Colleagues,

A few months have passed and meanwhile the Hydrogen Days 2015 conference has become history. The second international edition of this event continued in the wake of the promising start made in 2014. The audience has become more international and the scope broader with respect not only to the topic covered, but also to the significant presence of industry in parallel with academia. This has convinced us that the event has found its audience and has established itself internationally. For the new 2016 edition we have chosen the motto

## **HYDROGEN – CHANGING ENERGETICS AND TRANSPORTATION LANDSCAPE**

This is very true of today. We are fortunate in living in an era of revolutionary technological changes and challenges. Changes in the means of supplying society with energy, which includes the hydrogen economy as an important component of the scenario, are an inevitable part of it. This aspect is reflected to different degrees by the individual European nations. However, this does not change the fact that, sooner or later, reality will compel all of them to take part in this process. Therefore, I trust that the conference of Hydrogen Days 2016 will be a learning opportunity for us all. Due to the increased presence of representatives from Visegrad countries, complemented by most of the remaining countries of the Central and Eastern Europe region, the conference offers participants from all over Europe a great opportunity for networking and for strengthening their position through unity and collaboration.

I look forward to seeing you here in the charming city of Prague!

Karel Bouzek  
Chairman of the Scientific Committee

**7<sup>th</sup> International Conference on Hydrogen  
technologies**

April 6–8, 2016 | Prague, Czech Republic

# HydrogenDays 2016

## TOPICS

**Implementation of H<sub>2</sub> technologies in European regions**  
**Stationary systems and applications**  
**Transportation and mobile applications**  
**Cross-cutting issues**

## IMPORTANT DATES AND DEADLINES

Deadline for paper submission	November 30, 2015
Confirmation of acceptance	January 31, 2016
Deadline for standard registration	February 20, 2016
Final Programme displayed on website	March 25, 2016
Conference	April 6–8, 2016

## INVITED SPEAKERS

**Prof. Robert Steinberger-Wilckens** | University of Birmingham | United Kingdom  
**Jean Luc Delplancke** | Fuel Cells and Hydrogen Joint Undertaking | Belgium  
**Dr. Georg Menzen** | Federal Ministry for Economic Affairs and Energy | Germany  
**Dr. Deborah Jones** | Université Montpellier, CEA | France  
**Heinrich Klingenberg** | hySOLUTIONS GmbH, Driving Innovation for Hamburg | Germany  
**Prof. Ján Híveš** | Slovak University of Technology in Bratislava | Slovak Republic  
**Ph.D. Eng. Jakub Kupecki** | Institute of Power Engineering | Poland  
**Dr. József Margitfalvi** | Hungarian Hydrogen and Fuel Cell Association | Hungary  
**Ph.D. Ioan Iordache** | Romanian Association for Hydrogen Energy | Romania

Organised by:

Czech Hydrogen  
Technology Platform
