# INVITATION

Dear Colleagues,

For a long time hydrogen has been depicted as a fuel of future set to stay that way forever. However, the situation has changed drastically in the recent years as more and more countries decided to pave the way towards the goal of full decarbonisation of human activity with the help of the smallest molecule. Even now, hydrogen has already started to contribute towards our net-zero emission target of 2050 with new projects being announced each week.

It is therefore more than appropriate to choose the motto **Hydrogen for Decarbonisation** as the main catchphrase for Hydrogen Days 2022. The pace with which hydrogen is moving forward is immeasurable. Hydrogen is no longer a dream of group of enthusiasts but rather a solution that is already widely endorsed in the field of energy, transport or industry. This, however, does not change the fact that there is still a long road ahead of us. As with all technology, even in the field of hydrogen there is an immense potential for improvement. Nevertheless thanks to you, hydrogen has already come a long way and will inevitably contribute towards a greener, sustainable and decarbonised future.

We would therefore like to invite you to Hydrogen Days 2022, which will take place in Prague on 23<sup>rd</sup> and 25<sup>th</sup> of March 2022. Let us dive deep into a long awaited future with contributions on how hydrogen is already a convincing technology for various applications of today.

Within the framework of conference, the organisation committee has prepared an attractive opportunity for you to present your products and services to the participants, as well as to the visitors of this event. Do not miss this chance to enter this market and secure your company position here for the future.

Join us in Prague on March 23<sup>rd</sup> – 25<sup>th</sup> 2022!

Yours,

Organising committee
